First-year college student and self-taught digital marketer from Siwan, Kaithal, Haryana. I use AI for research, content, ad copy and campaign planning, and I build fast, responsive websites from the first wireframe to something you can click. Looking for internships, freelance work or a role that works around college hours.

WHAT I DO

- ◆ AI-led marketing — research, ad copy and campaign planning
- ◆ SEO and content built to rank
- ◆ Meta & Google Ads setup, testing and reporting
- ◆ Responsive web design and front-end build
- ◆ Analytics and reporting that points to the next move

JOURNEY

Self-taught over four months: HTML, CSS and enough JavaScript to make a page do something, then SEO fundamentals, keyword research and on-page work, then Meta and Google Ads and AI-driven workflows — culminating in building and shipping the Fitplay Gym site. Locally focused: same language, same market, faster feedback.
